ARCHITECTURAL SIGNIFICANCE (Describe important architectural features and evaluate in terms of other buildings within the community.)

Part of Five Fields, a community of contemporary houses designed and developed by The Architects Collaborative (TAC), this house is one of their early designs using post and beam construction and a 12-foot by 12-foot module. Like other Five Fields houses it has an open living/dining/kitchen area, smaller windows toward the street, and living room and large areas of glass at the back, facing the sun and view.

HISTORICAL SIGNIFICANCE (Explain the role owners played in local or state history and how the building relates to the development of the community.)

Built in 1953 and designed by The Architects Collaborative (TAC), this house is in the second section of Five Fields to be developed (see Five Fields area form). It was one of the models intended to provide more opportunities for custom design; other variations on this plan are at 476 and 440 Concord Avenue. This house has been modified by the extension of the living room to the south.
